Inventor: Heathe, William E.

428 Bud Gergory Blvd.
Mississauga, Ontario L4Z 2P3(CA)

(54) Method of processing molten plastic materials.

(55) Molten plastic material is transferred from a source (10) of molten plastic material to a nozzle (16) for supplying a mold (11) for the formation of molded plastic articles along a transfer path (14), which subjects the molten plastic material to shear heating along the transfer path (14) with the creation of a shear heating history. The shear heating history of the molten plastic material is substantially equalized by mixing the material at least once in the transfer path (14). The heating history of the molten plastic material is also equalized by mixing the material while it is in the source.

CATEGORY OF CITED DOCUMENTS

- X : particularly relevant if taken alone
 - Y : particularly relevant if combined with another document of the same category
 - A : technological background
 - O : non-written disclosure
 - P : intermediate document

- T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons
& : member of the same patent family, corresponding document
